

The diagram shows a 2D grid with a blue square divided into three regions: A (top-left), B (bottom-right), and C (top-right). A diagonal line runs from the top-left to the bottom-right. Arrows indicate movement directions: a vertical arrow pointing up from the top edge of the blue square, a horizontal arrow pointing right from the bottom edge of the blue square, and a diagonal arrow pointing down-right from the top-right corner of the blue square. A dashed rectangle is drawn around the blue square, and a solid rectangle is drawn around the entire grid.
